# Why do you need a POS on cloud?

- To run your restaurant from anywhere.
- To get instant updates with zero downtime.
- To reduce your efforts with streamlined operations.

A browser, internet connection and eZee Optimus. That's all you need to manage your F&B business smartly.

# Order **management**

Handle different types of orders without a hitch.

Be it dine-in, take away, room service or delivery.

Take the orders with all details and bring it precisely on the table.

# Table management and menu management

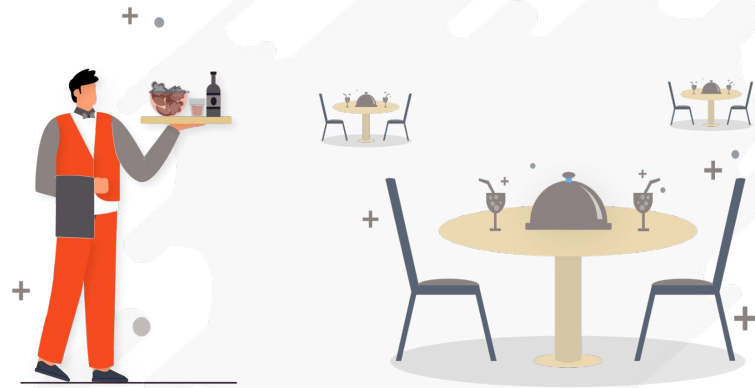

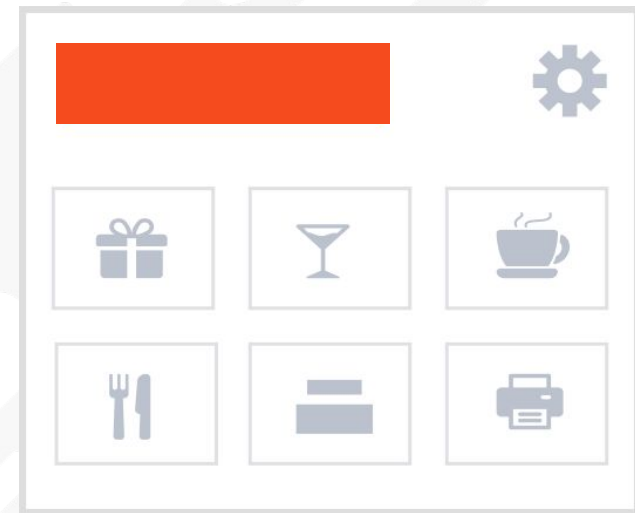

Table management gets easier then ever.

Assign servers, transfer orders: All in a trice.

Handle session wise, day wise, season wise menu in a jiffy.

Organize your extensive menu by collecting it in into groups, sub-groups, and categories.

# Payments and billing **management**

Offer your guests multiple payment modes.

Settle receipts and split bills as per your guests' requests.

Get the guest check to verify the order.

Managing your discounts, deals and offers gets easy.

# Inventory and stock management

Keep a real-time control on your inventory and stock.

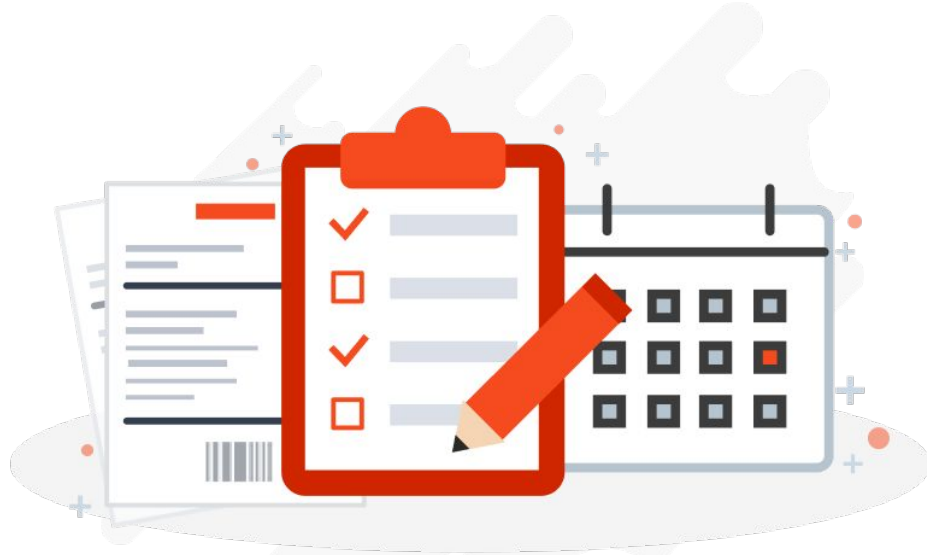

Forget the threats of theft and wastage.

Set a threshold value for your inventories and get alerts when they reached that level.

Thus, you can never go understock or overstock.

# Day close and user roles **management**

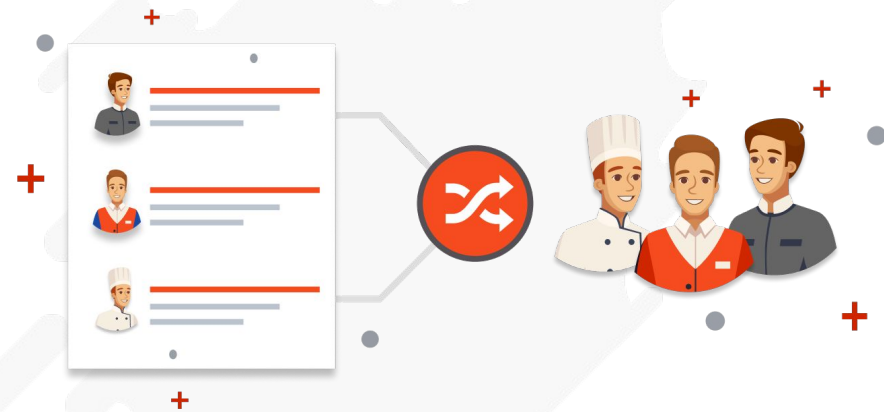

Day close gets as simple as 2 steps.

Get through all the required reports.

Create users and allot privileges to them as per their roles.

Secure your sensitive data from unauthorized access.

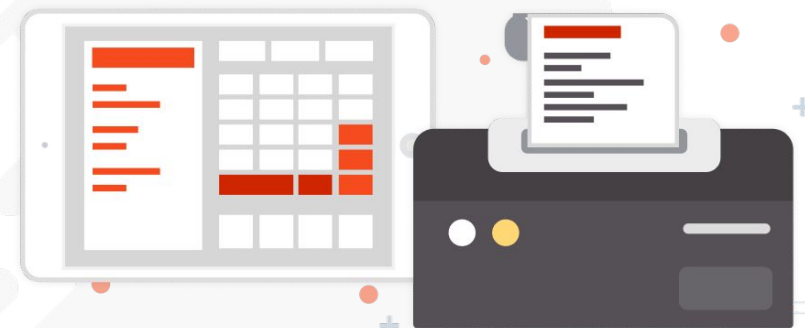

# Detailed insights and reports

Devise your restaurant performance everyday by daily reports.

Sales and purchase;  
Receivables and payables – get everything on a single tab.

No more settling down with  
default reports.

Get your reports in your way with  
customized report module.

# Shift management

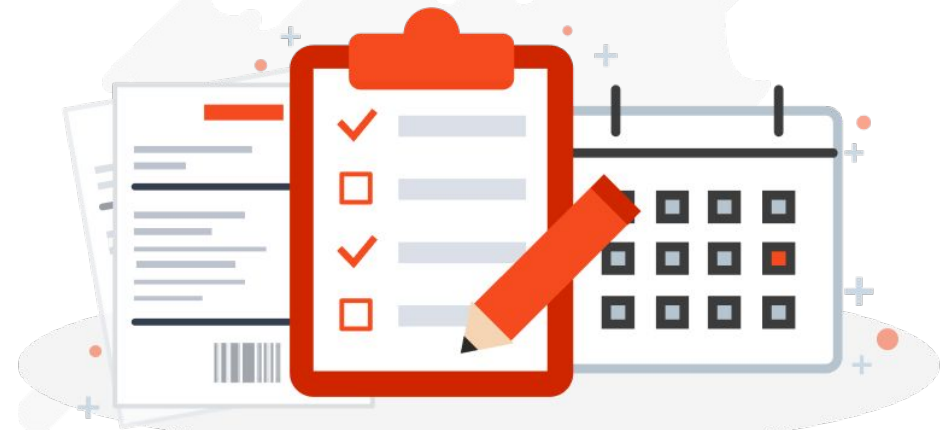

Managing shifts gets easier and convenient.

Track the income and expenses during each shift.

You get precise opening and closing balance.

Get all the detailed reports of any particular shift.

# Guest engagement

Marketing your restaurant gets sorted.

Attract your guests by sending emails and SMS.

Your guests get bills in their preferred language and currency.

Their preferences are saved, which makes you serve them better.

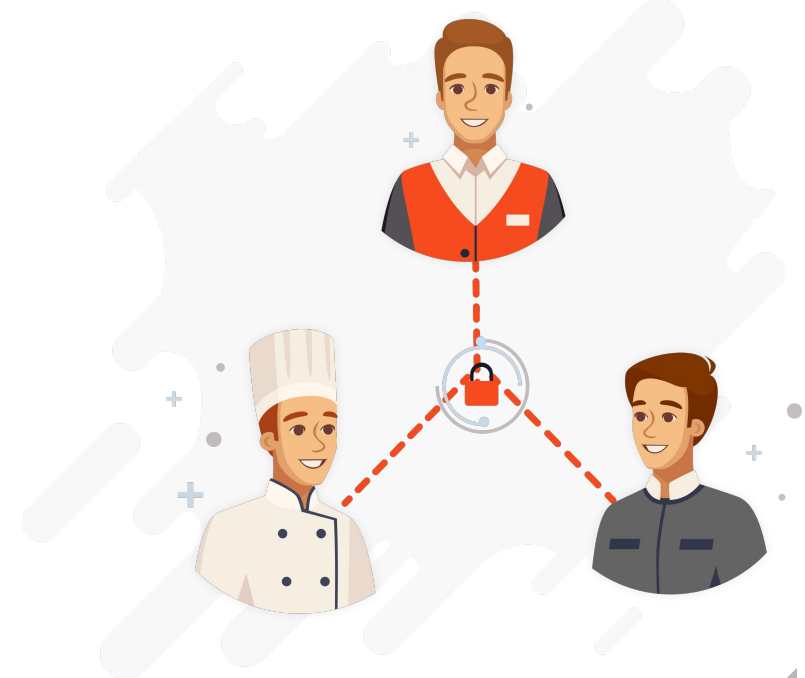

# Secured and **stable**

None of the activities at your restaurant gets unnoticed.

Closely follow each edited, deleted or updated transactions with audit logs.

Grant or deny the access permissions as and when required.

With no option called delete; you have every changes saved

# Restaurant chains

Create and manage N number of outlets from one place.

Day close is as easy for single or multiple outlets.

Manage your chainwide staff access.

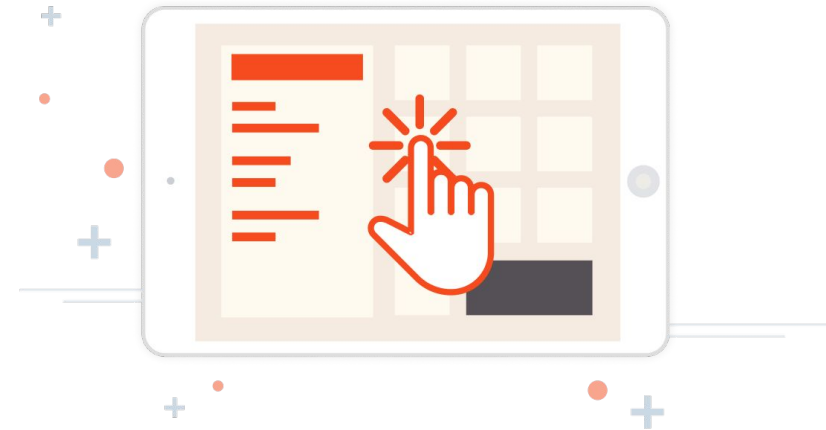

Get the consolidated reports of your entire chain.

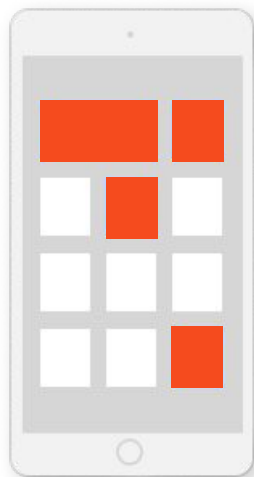

# Tablet-based Restaurant POS app

Present menu, print the bills and receipts right from the app.

With no installation troubles, start managing restaurant on the fly.

## Simplified orders with order taking app

Take and manage your orders with/without internet.

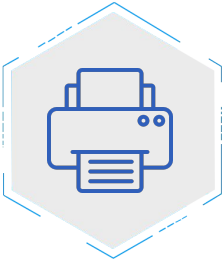

Deliver fast orders and impart the best guest experience round the clock.

# When POS is extended to work with peripherals

## **PMS Integration**

Seamlessly integrated with our cloud based hotel software eZee Absolute.

## **Payment Gateways**

Integration with major payment gateways, you can accept payments through any mode.

## **Financial Accounting Integration**

Integration with the major financial accountings to streamline your tax filing and maintain the exact cash flow.

# Testimony

**This is what I was looking for a Hospitality Software !!**

It is worth the money we spend on it! Easy and 24/7 Help support available. Easy to use, training and support on fingertips. They develop lot of reports based on the user preference. For me they did Maldives Tax report, Occupancy report and is developing green tax automation! Liabilities (Such as Taxes) are easy to track in different reports.
